www.myevport.com

LEADING THE FUTURE OF SUSTAINABLE TRANSPORTATION.

EV Port is dedicated to transforming the way we charge electric vehicles. Our mission is to provide accessible, convenient, and eco-friendly EV charging solutions that support a cleaner, greener future. With a commitment to innovation, we deliver cutting-edge technology and seamless charging experiences for all users.

Fast & Secure

CHARGING SOLUTIONS

3.3 kW AC Charger

7.4 kW AC Charger

30 kW DC Charger

40 kW DC Charger

60 kW DC Charger

EVPORT
Leading Future Mobility

3.3 kW AC Charger

- Sync with the smart building concept with ease
- Safe & convenient charging
- Load Management
- Socket : 3.3kW 6/16A 2P 2P+E Indian AC Socket
- For installation at home and SMES
- Activation and authentication via chargeMOD app
- Connectivity via URL Whitelisted M2M SIM or Wifi
- Easy and fast commissioning
- Highest security standard

30 kW DC Charger

- 30kW Single CCs-2
- RFID/NFC Reader
- Ethernet or 3G/4G connection
- Slim & compact design
- Communication module for OCPP connection
- Reduced Installation cost
- Increased Reliability
- Durable UV resistant exterior
- Low maintenance

40-120 kW DC Charger

- Operable in extreme high temperatures without power derating
- Charges upto 2 vehicles at a time
- CCS2, CHAdeMO, GB/T, & 22kW AC Type 2 outputs
- Optional 22kW AC Type 2 output
- >95% energy efficiency
- 7" touchscreen user interface
- Intuitive user experience
- Authentication methods: RFID, QR code, plug & charge, mobile app
- OCPP 1.6J remote management
- IP54 rating water resistant

180-240 kW DC Charger

- Slim & compact design
- DC 180kW, CC-2, upgradeable upto 240kW
- Reduced installation cost
- RFID/NFC Reader
- Increased reliability
- Communication module for OCPP connection
- Durable UV resistant exterior
- Ethernet or 3G/4G connection

7.4-22 kW AC Charger

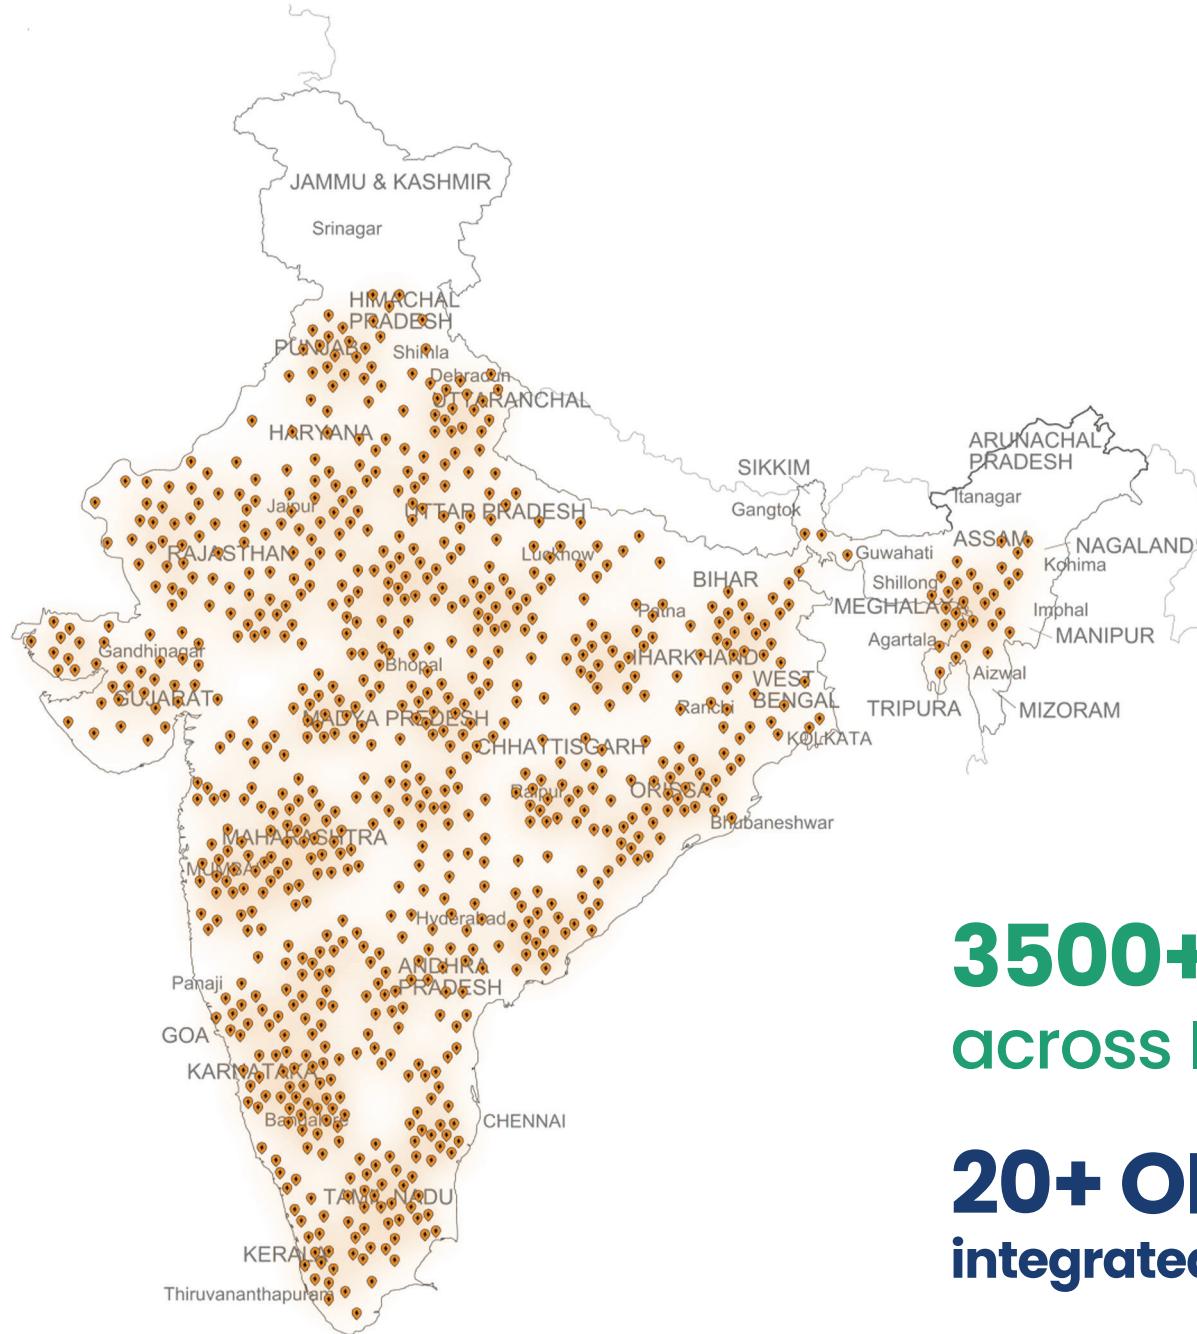

- Sync with the smart building concept with ease
- Safe & convenient charging
- Type 2 Gun: 7.4/11/22kW AC Type 2 Gun
- For installation at home and SMES
- Activation and authentication via chargeMOD app
- Connectivity via URL Whitelisted M2M SIM or Wifi
- Easy and fast commissioning
- Highest security standard

3.3 kW AC Charger

- Added safety : 3 layer of safety protection to safeguard you and your EV
- Fast EV Charging : Upto 3x faster than a normal 3-pin plug
- Better than the domestic 3PIN socket
- Over the Air (OTA) Updates : Get the latest firmware updates remotely
- Inbuilt smart energy master monitor all the electrical parameters remotely

7.4-22 kW AC Charger

- Inbuilt energy metering (optional)
- IP55 rating water resistant
- Adjustable load current (15A/22A/32A)
- Fully operable up to 55°C
- Built in Cable-tidy and gun stowage
- Compatible with a wide range of electric vehicles

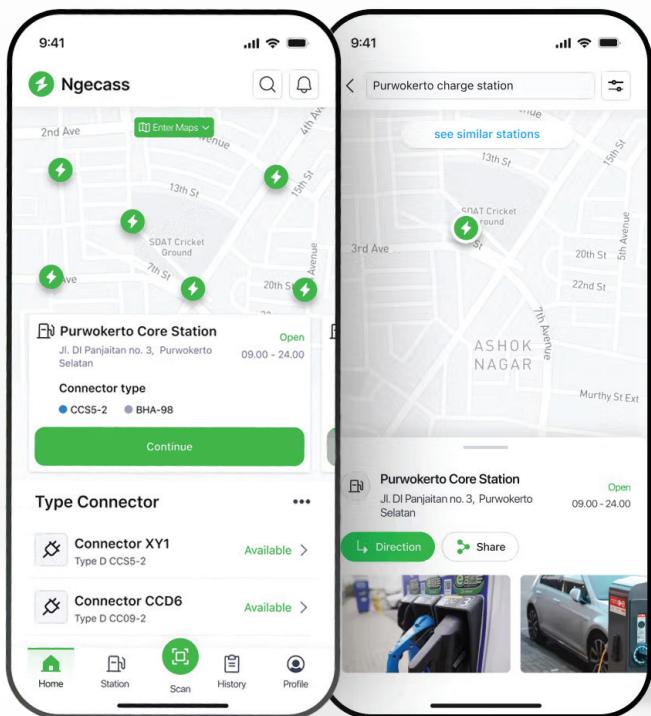

Strategic Partner
chargeMOD

3500+ Charge Points
across India and growing.

20+ OEM CHARGERS
integrated with chargeMOD network

ChargeMOD APP

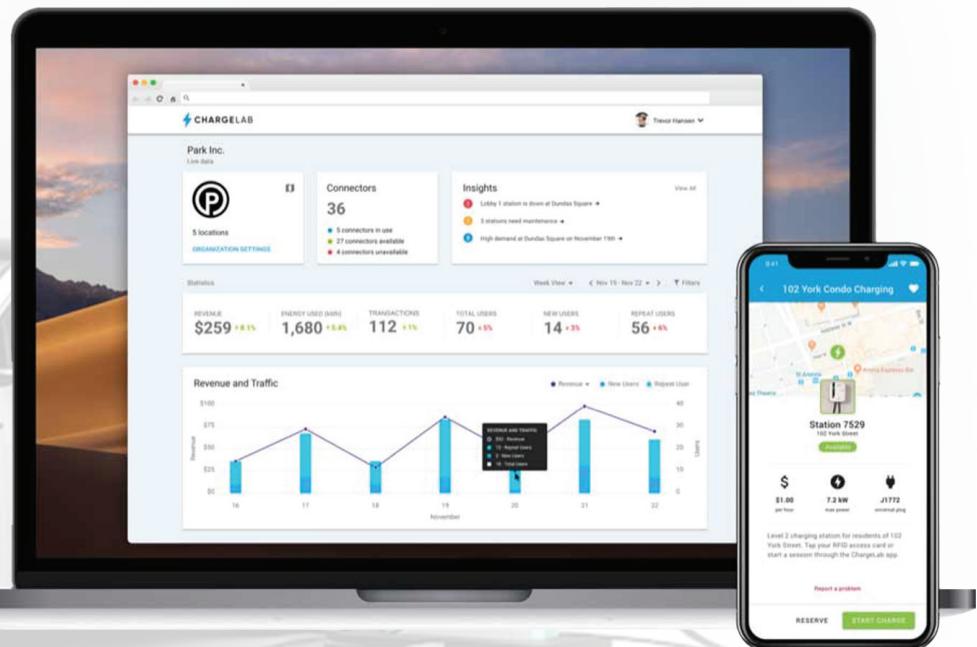

EV Charging made easier through chargeMOD App. The easiest way to find available stations, start charging and get updates when your EV is fully charged

- 📍 Locate a nearby charger
- QR Scan the QR code
- ⚡ Start charging and go

CMS

A complete solution for backend monitoring, and control of the charging stations. The charge MOD CMS provides seamless management of the entire system.
